## EDUCATION

### CASE WESTERN RESERVE UNIVERSITY

Bachelor of Arts in Computer Science and Music; Minor in Mathematics

Cleveland, OH

Expected May 2025

**Cumulative GPA:** 3.94/4.0; Dean's High Honors List

**Coursework:** Data Structures | Algorithms | Programming Language Concepts | Artificial Intelligence (AI) | Machine Learning (ML)

## SKILLS

**Programming Languages:** Python | Java | SQL | JavaScript | HTML/CSS | C/C++ | C# | Racket | Haskell | Prolog

**Technical Skills:** React | Databases | APIs | Git | Linux/Unix | Windows OS | Unity | Data Science | Object-Oriented Programming

## WORK EXPERIENCES

### Carnegie Mellon University

Pittsburgh, PA

#### RESEARCH INTERN

May 2024 – Dec 2024

- Implemented a multimodal model to evaluate user interfaces (UIs) and produced a demo front-end application for users.
- Automated the collection process of a large dataset of over 100,000 screenshots and generated a UI element filtering algorithm.

### Case Western Reserve University

Cleveland, OH

#### UNDERGRAD RESEARCHER

Sep 2023 – May 2024

- Built ML regression models to predict students' engagement and performance levels from their textbook activities.
- Utilized data science techniques to efficiently structure and preprocess large time series datasets and evaluated various models.

### Case Western Reserve University

Cleveland, OH

#### JUNIOR DEVELOPER

Aug 2022 – Dec 2023

- Collaborated in a small team to maintain and troubleshoot the school's website using front-end development tools.
- Designed and delivered weekly Drupal and website management training for Engineering faculty and staff.

### University of Massachusetts Amherst

Amherst, MA

#### RESEARCH INTERN

Jun 2023 – Aug 2023

- Optimized a Neural Network model, achieving a 94.03% accuracy rate for real-time carbon intensity forecasts in 27 regions.
- Utilized Python's Pandas library for pre-processing time series data and generated data visualizations using Matplotlib.

## PROJECTS

### PERSONAL WEBSITE | React, Python, JavaScript, HTML/CSS, Git

- Developed a responsive portfolio website to showcase achievements and utilized full-stack development techniques.

### AI AGENT HOSTILITY SIMULATOR *(ongoing)* | Python, Unity, TensorFlow, Git

- Created a multi-agent simulation to study variations in AI hostility and violence influenced by resource availability.

### LANGUAGE INTERPRETER | Programming Language Concepts, Racket, Functional & Object-Oriented Programming

- Developed a programming language interpreter in Racket for a made-up object-oriented language similar to Java and C.
- Tested the interpreter with over 100 test cases to ensure its workability across various edge cases and possible errors.

### MARITIME AIS PREDICTOR | Python, Scikit-Learn, Pandas, NumPy, Matplotlib

- Conducted clustering analysis on Automatic Identification System (AIS) data from maritime vessels to predict vessel movements.
- Optimized clustering algorithms, performed feature selection, and pre-processed the datasets, achieving up to 90.8% accuracy.

### PLATFORM ADVENTURE GAME | Unity, C#, Git/GitHub, Communication Skills, Teamwork

- Created a 2D platform game featuring a playable character navigating obstacles and tackling a final boss (5-minute gameplay).

## ACTIVITIES

### UNIVERSITY ORCHESTRA

Section Leader (1st Flute)

Cleveland, OH

Aug 2021 – May 2024

### ADVOCATES FOR IMMIGRANTS & DIVERSITY

Secretary (Executive Member)

Cleveland, OH

May 2022 – Dec 2023
